## SEMI-ANNUAL REPORT ON FOREIGN EXCHANGE TURNOVER

### April 2022

The Semi-annual Report on Foreign Exchange Turnover compiles data from 23 financial institutions that are active in the Australian foreign exchange market and is drawn from the Reserve Bank of Australia's semi-annual turnover survey. The results for April 2022 are presented in the summary tables and charts below.<sup>1</sup>

The main findings of the report are:

- Total average daily turnover in all OTC foreign exchange instruments in the Australian market was US\$150.4 billion in April 2022.
- Average daily turnover in traditional OTC foreign exchange instruments (spot, outright forwards and foreign exchange swaps) in the Australian market was US\$145.6 billion in April 2022.
- Average daily turnover in OTC options and cross-currency interest rate swaps (currency swaps) in the Australian market was US\$4.8 billion in April 2022.

Tables 1 to 5 report summaries of foreign exchange turnover in the Australian market by instrument, counterparty, currency and maturity for April 2022, with some comparisons to October 2021. Tables 6a to 6c provide the full set of data for April 2022.

For the purposes of this report, turnover is defined as the gross value of all new deals entered into during the month (regardless of whether or not settlement was made during the period) and is reported in terms of the nominal or notional amount of the contracts. Figures reflect all deals struck in Australia, irrespective of where deals are booked (i.e. data are collected on a sales desk basis). As such, survey results are directly comparable to the Bank for International Settlements (BIS) Triennial survey. All amounts in this report are converted to US dollars using the average AUD/USD exchange rate for the month in which data are collected.

The next semi-annual report will be released in January 2023, presenting data for October 2022.

---

<sup>1</sup> Data for selected series can be accessed in Tables F9 and F10 at: [www.rba.gov.au/statistics/tables/](http://www.rba.gov.au/statistics/tables/). Data included in this semi-annual report are correct as at 29 July 2022. As the data in the Statistical Tables F9 and F10 are subject to ongoing revision, discrepancies may exist between the data contained in the semi-annual reports and in Statistical Tables F9 and F10. Due to changes in the methodology used for compiling spot turnover data by one or more reporting institutions in April 2021, data prior to this point are not directly comparable.

Similar semi-annual foreign exchange turnover surveys are conducted for a number of foreign exchange markets.<sup>2</sup> The results of these surveys can be found at:
